Fallback: leave the wall only (Circle)

The coach decides when to use this. It's for when the full route isn't safe, for example the partner can't stay out of our lane, or we're on a field we haven't tested.

In **Odo ROBOT Shoot + Park** (or the timed **Pollen ROBOT Shoot + Park**), after INIT and Triangle, press **Circle** once. **Do it again every match you want it:** at the next INIT the robot goes back to the full route by itself (since `pollen-odo-v6`), so a Circle press can't sneak into a later match.

The robot shoots exactly the same way, then only drives **about 2 feet (61 cm)** forward and to the left, away from the wall. It does **not** go to the parking slot.

- Points: **LEAVE 3** only, not PARK. Our partner can use either parking slot.
- Place the robot exactly as on the Shoot + Park page.
- The first line of the screen says `ROUTE: LEAVE ONLY (Circle): shoot, then a 2-ft move. WILL NOT PARK`, and the Settings notice says `LEAVE-THE-WALL FALLBACK: shoot, then a 2-foot move; does NOT park. Triangle = full route`.
- Changed your mind? Press **Triangle** to go back to the full route.
- Circle does nothing in the Supporting Shooter.
